

CONTRACTORS

The following list is arranged by County but some Hedge Layers work over several counties so please check adjacent counties for the Hedge Layer you require.

The National Hedge Laying Society takes every care to ensure that the workmanship of its members are to the highest standards, however we are unable to warrant any work done by individual contractors. You are advised to seek several quotations for any work and ask for references from previous customers. If at any time you are dissatisfied with work carried out by any of our members then please let us know.

Where a Hedge Layer is shown as “ACCREDITED” the society has examined their work, and that they have been accepted as craftsman of the highest skill. Each accredited craftsman carries an Identity Card and or a Certificate of accreditation.

Styles of hedge-laying are shown against the names as an indication only. We encourage the use of traditional styles in the various regions, however not all styles are suitable for every hedge. Sadly, no matter how highly skilled the craftsman, it is impossible to make a good hedge from nothing.

To help you choose a suitable craftsman to meet your requirements we have also included related tasks undertaken by each contractor.

We would also like to hear from you if you think any of our members have done and exceptionally good job for you.

If you require any further information please contact us through our web site:

The Treasurer is the membership officer. nhls.treasurers@googlemail.com

Could you please forward any membership queries to the above?
